

GASOLINE GOSSIP GLEANED AT GARAGES

Manager Seymour Hall of the Associated Garage reports a busy week and many sales made. John McGuire of Kalihi, Hawaii, bought a Chalmers 40 a few days ago, and as he is in town at present the machine has been seen doing good work around the city.

William A. Chong of Kahului purchased a Franklin car, and it was shipped to him during the week. The Franklin is a fine machine and there are quite a number of them in the Islands.

There has been a great demand for Chalmers, Hudsons and Pierce-Arrows, and the Associated people have taken many orders for machines that are booked to arrive during the next few months. The Pierce-Arrows are beautiful specimens of automobiles, and the finish always attracts attention.

The Hudson Twenty is also going strong, and the demand for the low-priced cars is growing every day. It is thought that the 1911 models will cause a great rush for the machines of all makes.

The new tire department of the Associated garage is kept busy all the time, and the expert master of rubber goods is turning out some splendid work with the aid of the machinery that has been installed. The rush of repair work has been big, and a long-felt want seems to have been supplied.

The Rambler automobile is a medium price car that is attracting a lot of attention, and H. A. Wilder, who is handling the machine, reports quite a number of inquiries. The Rambler has many taking points about it, and as it sells at from \$1,800 to \$2,500, there are many sales being made in these Islands.

The von Hamm-Young company have augmented their garage staff by the addition of an expert on charging of batteries, magnetos, etc. In order to give their friends the best attention possible, they went to the Coast for Mr. McCorkle, who has the reputation of being one of the best experts on the Coast on charging of electric cars, storage batteries, work on magnetos, etc. As soon as the new showrooms are finished, which will be in a week or two, a large charging plant will be installed in the rear of the Young building, which will be in charge of Mr. McCorkle.

In spite of the hot summer weather, the automobile business is going along merrily. The Packards, the Cadillacs, the Buicks, the Thomas Flyers and other cars handled by the von Hamm-Young company are still in constant demand. Several sales were closed during the week, among them being a fine Cadillac touring car, which is going to A. W. Eames of Waikiki, and an Overland, which was shipped to Gari Kaldeyer, the Maui subagent for the von Hamm-Young company.

Quite an interesting event occurred on the mainland lately in which a Cadillac car proved to be faster than the big Curtiss aeroplane, and twice defeated the Rheims championship flying machine.

Two interesting races between machines of the air and earth took place recently at Jacksonville, Fla., and in each the automobile was victor.

The aeroplane was a Curtiss machine—the very same, in fact, in which Curtiss himself won the world's championship in the recent Rheims meet. A Cadillac Thirty was the automobile; and its victory over the flying machine is made more notable by the fact that only a week before the latter had defeated a celebrated racing motor-car and driver at the Atlanta races.

Charles K. Hamilton drove the aeroplane, an eight-cylinder, 40-horsepower machine. Dexter Kelley drove the stripped stock chassis of a Cadillac Thirty.

Both races were for five miles. In the first, the Cadillac won by 12 seconds; and in the second it crossed the finish line a winner by 7-5 seconds.

E. E. Dodge, who has been in charge of the von Hamm-Young garage, went to the Coast on the Wilhelmina for a well-earned vacation, incidentally combining business with pleasure. During Mr. Dodge's absence, Frank Shaver will be in charge of the von Hamm-Young garage.

The von Hamm-Young company have received from the Packard Motor Car Company some interesting information which shows the unprecedented demand for Packard cars. The Packard Motor Car Company states that the sales for 1911 cars up to June 3 were 90 per cent. in excess of the sales during the same period last year. At this rate it will not be very long before the Packard out-goes the old way-ahead, hence a word to the wise in ordering one of those cars early will be quite to the point.

The Chapman Garage received two

Ford cars by the Nevada and both have been already sold. The running car is a beauty, and the engine runs like a watch and goes like a rifle. The Ford number 40 is also a fine-looking car, and the auto which they sent to the Chapman garage attracted a lot of attention.

The Chapman factory has enough cars to keep up with the demand, and the Chapman 25 machine is being sought in several municipalities. The Chapman appears to be the most popular among the islands these machines are to be seen, and the agents have ways of getting on the road with the Islands. The Chapman garage expected a dozen or more of the Seven Jewels, but were disappointed. The auto—such however, came Hawaiian within short time.

The ever-popular 1911 model is selling just as rapidly as when first introduced at the beginning of the year. The Islands these machines are to be seen, and the agents have ways of getting on the road with the Islands. The Chapman garage

expected a dozen or more of the Seven Jewels, but were disappointed. The auto—such however, came Hawaiian within short time.
